## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1<sup>st</sup> phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15<sup>th</sup>. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Neena Sharma,(IAS), Director of Census Operations Uttar Praesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

## Preface

The District Census Handbook (DCHB) published by Census Organisation since 1951 Census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics (village-wise and town-wise) of the district along with the status of availability of assets, amenities, infrastructural facilities, etc of Households. It is expected that this publication will help the planners in formulation of micro level development plans.

The District Census Handbooks (DCHBs) are brought out in two parts giving village and town wise data for each district. The Part-A contains non-census data for each Village and Town and is called Village and Town Directories. The Part-B provides census data for rural areas up to the village level and for urban areas up to the ward level for each town or city in the shape of Primary Census Abstracts.

The present series of 2011 census DCHBs known as "**DCHB-Part-A**". The village and town level amenity data have been collected in pre printed schedules which was filled up by the district administration and compiled and computerized in prescribed record structure. The DCHB is to provide a descriptive account of the district along with motif and history, highlighting significant characteristic of the district, administrative setup, certain analytical report based on PCA and amenity data and village and town directory including the SCs and STs PCA up to tahsil/town levels as annexure. The data of C.D. Block (Vikas Khand) are at rural/urban and village levels are being presented in this volume. In Village Directory, all amenities were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. This includes educational facilities, medical facilities, drinking water, post & telegraph, communication, bank, credit societies and recreational facilities being availed by the respective villagers. In Town Directory, the information of all statutory towns irrespective of their class, and basic amenities available in the towns are analyzed in depth with the help of a number of cross-classified inset tables and statements which reveals the significant characteristic of the Towns.

**ANALYTICAL NOTE**

**(i) History and Scope of the District Census Handbook**

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity wasn't available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz., (i) Status and Growth History

of towns,(ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv)Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi)Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

**(ii) Brief History of the District:**

District Meerut is said to be associated with the earlier tradition of the Hindus according to which Maya, the father-in-law of Ravana, founded this place which has, therefore, been called Maidant-Ka-Khera. According to another version Maya a distinguished architect, got land from king Yudhisthira on which the city of Meerut now stands and he called this place Mayarashtra, a name which in course of time became shortened to Meerut. Tradition also has it that the district formed part of the dominion of Mahipal, king of Indraprastha and the word Meerut is associated with his name. This district of Meerut came into existence in 1918 and included the southern division of Saharanpur district. Meerut district has distinguished itself as the nerve-centre of the development of western Uttar Pradesh. The vast strands of history of Meerut eventually find their beginnings in the pre-historic period and cover a wide spectrum of time and space to bring this cosmopolitan town to its present status.

The birth of Meerut may go even as far back as 6000 years before the classical age of Vedas. The archaeological excavations in Hastinapur and Rajpur Parasan indicate that the illustrious, Indus valley culture thronged in this area too. Thus the origins of this place may even go back to the pre-historic age. The excavations in Alamgir village on the bank of river Hindon in 1958 very clearly indicate that when the Aryans subjugated this area it could well have been a tribal habitat.

As mythology would put it Meerut was the hometown of the classical king Ravana's wife called Mandodari. The existence of Bilkeshwara temple archaeologically testifies it. It was here that Mandodari and her father Maya used to perform their worship. Indraprastha, the famous town built by Maya later on became the cause for the epic war of Mahabharata. Hastinapur was the capital of Kaurava and Pandava while Parikshit Garh was the capital of Raja Parikshit.

The Greek historians of the second century called this area as Bastinopora (Hastinapur) which indicates that even during the ancient times this place was accorded international recognition. Much earlier than that i.e. in about 600 B.C., this area formed one of the sixteen great districts (metropolitan areas) or one of the sodas Mahajanapadas of North India. Later on Mahapadmananda annexed this area which subsequently formed part of the kingdom of Chandragupta Maurya. During the period of Maurya dynasty the famous town of Hastinapur is said to have been destroyed by a devastating fire. However the area of Meerut district always occupied a prominent place in the Mauryan period.

Even for Ashoka the great ‘Mirath Mandal’ had a special significance. This famous ‘Shaka dynasty’ was ruling over this area till 200B.C. when the Yayudhas overthrew them. They ruled over about 80 years.

Kustaianas ousted the ‘Yayudhas’ and ruled over this area for about 40 years after, which the ‘Yayudhas’ again came back to power. In the subsequent period Samundra Gupta subjugated this area. Afterwards this area watched Yashovarman and Tomar kings coming and going. The Pratihars became very powerful in the 9<sup>th</sup> and 10<sup>th</sup> centuries and overthrew the Tomars. In the clawing days of Hindu period the famous Chauhans ruled here. Thus the area of Meerut district had the privilege of being ruled by almost every famous Dynasty of Hindu period and inherited the best of their traditions and culture.

The Muslim Sultanate made its first inroads in this area after the defeat of King Prithiviraj Chauhan in 1192. After the first Sultan Qutub-u-ddin Aibak’s rule Meerut district was under Sultan Babban who constructed a mosque in Garhmukteshwara in 1283. This is known as the famous Dargah Sharif today. Meerut faced the vagaries of a big drought in 1314, which has been recorded by the historian Alberuni. In 1390 Ferozshah Tuglaq used Meerut as prison-house. Only eight years later Taimur invaded the area of Meerut district and butchered a vast number of people here. Probably these historical developments planted the seeds of love for independence in the hearts of the people living in this area. In the historical documents ‘Tawarikh-I-Ferozshati’ the famous historian Ghiyasuddin Barni records that revolt lies in the hearts of the people of this area who are basically ‘freedom - loving’. He mentions that Meerut district used to be the hotbed of seditions and intrigues due to which this area was always kept under very tough and tyrannical rulers.

Meerut area was under Syed rule upto 1451 when the sultan of Jaunpur, Hussain Sharif, attacked Meerut and Bahlol Lodi made a compromise with him. After the battle of Panipat, Meerut came under the first Mughal Babar, in 1526 with a brief gap of Shershah Suri’s regime from 1540 to 1556 after which Humayun regained this area, followed by the illustrious period of Akbar the great, which was an era of reformation, reconstruction, and also of the evolution of the composite Hindu- Muslim culture. Akbar even had established one of his mints in Meerut. The last Mughal emperor Aurangzeb even named a few towns after him. In 1739 Nadir shah’s invasion again shook the peace and freedom loving people of Meerut down to their hilts. Nadir and his army looted Meerut and committed enormous atrocities here. The district was established under British rule in 1818 and on establishment constituted the then tehsils of Meerut, Ghaziabad, Mawana, Baghpat, Sardhana and Hapur.

As history would have had it, the freedom loving people of Meerut were instrumental in leading the revolt of 1857 by sparking of its first embers on the 24<sup>th</sup> of April 1857 soldier of the third cavalry regiment refused to operate the objectionable cartridges. Given a ten year punishment the same soldiers revolted on 10<sup>th</sup> of May 1857 and shot dead the commander of the XI regiment. Thus the people of Meerut participated in the freedom struggle and became the pilots of this movement.

On the north it is bounded by district Muzaffarnagar and on the south by district Ghaziabad, in the east by district Bijnor and Jyotiba Phule Nagar, in the west by district Baghpat. The holy river Ganga form its natural boundary in the east and the river Hindon in the west. It is the district headquarters' and headquarters of Comissionary. It is very near (i.e. about 100 k.m.), to the National Capital, 'New Delhi'. It is rectangular in shape. The geographical area of the district is 2559.0 sq. km.

**Physiography**

The district Meerut is a part of northern upper Ganga plain. It lies in the upper Ganga Doab roughly in a rectangular shape. The Ganga and Hindon form its boundaries in the east and west respectively.

The district is almost a levelled alluvial plain with a slight slope from north to south or south to east. The whole of the district is a well-cultivated plain and there is no uneven ground except in the area of ravines near the river valleys and the scattered bhur ridges in the upland tract. The whole district is a tract of extraordinary fertile soil. On the basis of Geology, Soils, Topography, Climate and natural vegetation the district is divided into the following four sub-micro regions-

- 1) Hindon Plain
- 2) Meerut Plain
- 3) Mawana Bhur Tract
- 4) Ganga Khadar.

**Hindon Plain**

The region covers a small portion of Sardhana and Meerut tahsils. It slopes towards south. The Hindon is the main river in the region. The tributaries of the Hindon flow parallel to it before joining at different places in the region. The tributaries are non-perennial. Physiographically the area is dull. Geographically, this region belongs to Alluvium, Dun gravels of recent age.

**Meerut Plain**

It is a flat plain sloping towards south. Compared to its peripheral areas, the central portion is lower. Physiography is monotonous. Few depressions are the main geographic feature. The plain can be said as a 'bread basket' tract of western Uttar Pradesh. Geologically, this region belongs to Alluvium, Dun gravels of recent age.

**Mawana Bhur Tract**

The region is spread over in an elongated shape extending in north-south direction in Mawana tahsil. There is a chain of Bhur or sand ridges located in this belt. These sand dunes are locally known as Palauta. Most of the sand dunes are reclaimed and the area is used for agriculture. The area slopes towards south. Geologically the region belongs to Alluvium, Dun gravels (recent).

**Ganga Khadar**

The region is situated parallel to Ganga river in north-south direction in Mawana tahsil. Slope of the region is governed by the Ganga river which flows from north to south. Dead arms of rivers, swamps, local depressions are the main topographical features. Sand dunes are located sporadically. Geologically, the region belongs to Alluvium, Dun gravels of recent age.

### **Drainage**

The rivers Ganga and Hindon are the principal rivers of the district. Burhi Ganga is a tributary of Ganga while Kali Nadi is a tributary of Hindon River. These tributaries are non-perennial. The area is flat with very little variation in slope. There are few patches of rugged surface along the river Hindon in the southern part. The Ganga River flows from north to south direction in Mawana Tahsil. There are number of small rivulets along the Ganga which are actually the abandoned old course of the main stream. Sand dunes are located sporadically. There is a chain of Bhur or Sand Ridges along the riverside's in this tract. The land has become uneven on the sides of the river. Still there is no problem of drainage in the district as 90% part of the district is leveled alluvial plain.

### **Climate**

This area has climate variation of extreme kind, ranging from extremely hot in summers and extremely cold in winters. The temperature starts rising from the beginning of March signifying the onset of summer. The western winds locally known as 'Loo' begins to blow in April. The heat is maximum in May and June when the temperature goes up to 40-45 centigrade. The season of monsoon is humid. Thus this region goes through various seasonal vagaries throughout the year. October and November are the ideal months for sowing of Rabi crop. Scarcity of rain occurs in the district.

Thunderstorms occur in the summer and monsoon months, their frequency being higher in the month of June and September. Dust raising winds are common in the summer afternoons. Fieldwork especially agricultural operations are carried out in the district from July to March / April after the harvesting of crops is over.

#### (v) CENSUS CONCEPTS AND DEFINITIONS

**Building:** A ‘Building’ is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Pucca houses:** Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

**Kutcha houses:** Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

**Dwelling Room:** A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant’s household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census House :** A ‘census house’ is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

**Village:** The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area:** The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. **The urban-** area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

**(a) Statutory Towns :** All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

**(b) Census towns:** All other places satisfying the following three criteria simultaneously are treated as Census Towns.

- i) A minimum population of 5,000;
- ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
- iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as ‘urban’ all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

**Urban Agglomeration:** An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an ‘urban agglomeration’. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and
- (b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

**Out Growth (OG):** The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

**City:** Towns with population of 100,000 and above are called cities.

**Household:** A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

**Institutional Household:** A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household :** Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

#### **Concepts used in VD and TD of DCHB:**

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

**1.1 Pre-primary (PP):** Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from preprimary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

**1.2 Primary School (P):** Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

**1.3 Middle School (M):** Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

**1.5 Senior Secondary School (SS):** Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

#### (ix) Brief analysis of the Village Directory and Town Directory data based on inset tables 36 to 45

One of the major part of the District Census Handbook is Village and Town Directories. These are non-census data incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

Similarly there are 509 or 84.27 per cent village have been linked with the pucca road. Total 590 or 97.68 per cent of village have been provided with the electricity supply. Almost similar pattern of distribution of village by availability of amenities in the villages at C.D. block has been found with slight variation. Sardhana C.D. block has the highest 97.83 per cent villages where educational facility is available and lowest 62.22 per cent is found in Hastinapur. Medical facility is highest in Rohta (84.44 per cent) and lowest (32.22 per cent) in Hastinapur C.D. block. Improved drinking water and telephone facility is available to cent-percent villages in all the CD blocks. Post office facility is highest in Shurupur Khurd (61.76 per cent) and lowest 10.42 per cent in Daurala C.D. block. The village directory as the title connotes presents information pertaining to rural areas of the district at C.D block/village level. For each C.D. block a list of villages serialized by English alphabetical order along with their location code numbers of 2011 and 2001 census has been presented. The rational of giving 2011 location code along with 2001 location code is to facilitate the identification of villages for matching information collected at each Census. The villages which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat is listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references.

For the census work, the villages in the district have been arranged taluka wise (C.D. block wise) and within the taluka (C.D. block), they are shown location code wise. Each village is assigned a location code number for the purpose of identification. In 2011Census, all the villages have been given unique 6 digits code number, which will remain constant across the census, and shall make it easy to do comparative study. The village code of 6 digits has been used continuous code within India. Range of 000001-799999 has been kept for villages. The village directory information, a map and alphabetical list of village for each taluka (C.D. block) is given in Part-B. Village directory contains the non census data of each village. It gives the village wise basic information relating to infrastructure and amenities available in the sphere of education, medical, drinking water, power supply, post and telegraph, communications, approach road to village and distribution of land use area. In addition it contains information about total area of each village, total population and number of households and the nearest town and its distance from the village. The information on number of households and total population has been included with a view to examine the correlation of amenities with the number of households and population they serve. If an amenity is not in existence in the refer rant village, the distance in broad ranges from the nearest place along with name, where the amenity is available is given.
